

Two Biological Sexes

OPENING FRAME → START HERE

Sex is binary, binary is biological, and telling the truth is the only compassionate path — especially for children.

DEBATE PATH

- 1 Creation: “Male and female He created them” — intentional, good, binary (Gen 1:27).
↓
- 2 Biology: XX/XY in every cell; hormones and surgery cannot change sex.
↓
- 3 Kids: Most dysphoric children desist if not socially transitioned; blockers are not “neutral.”
↓
- 4 Truth: Affirming a falsehood is not love (cf. anorexia). Reality is not hate.
↓
- 5 Conscience: Compelled pronouns and speech are forced falsehood — resist (Acts 5:29).

COUNTERS

THEY SAY
“Affirmation prevents suicide”

YOU SAY
Swedish long-term data: post-transition suicide risk remained extremely elevated. Transition ≠ cure.

THEY SAY
“Intersex proves a spectrum”

YOU SAY
DSDs are rare disorders of a binary system — they don’t erase male and female.

THEY SAY
“This is a civil-rights issue”

YOU SAY
Race is irrelevant to sexed spaces. Sex is real and often decisive (sports, prisons, shelters).

THEY SAY
“Gender is a social construct”

YOU SAY
Sex is binary and universal. “Gender identity” detached from sex is ideology, not discovery.

CLOSE → → Separate adults’ distress from medicalizing kids. Protect women and girls’ spaces.
